LUMENDATA
Modernize Data. Maximize Insights.

BCG Partners with LumenData to Master Supplier and Office Domains in Informatica SaaS MDM

Business Challenges

- Inadequate insight into supplier expenditure.

- Inability to uniquely identify supplier and their relationships.

- Absence of standardized governance and consistency in capturing key supplier risk attributes.

- Absence of an established procedure to cleanse supplier data.

- Inability to standardize office location data for uniform utilization across businesses and internal ecosystem.

IT Challenges

- Data errors and increased processing time because of manual data manipulation within files.

- Limited real-time data visibility due to reliance on file-based reporting.

- Disparate data sources, leading to data inconsistency and difficulties in data integration.

- Data inaccuracy due to maintenance of reference data on spreadsheets.

Solutions

- Leveraged Supplier 360 for Location, Client, and Practice Area domains and R360 to provide analytical and operational MDM solution.

- Leveraged Informatica CAI to migrate the reference 360 assets and reference data.

- Established a common data model for key supplier attributes.

- Formalized data rules to standardize and harmonize supplier master data.

- Established a data pipeline from supplier master source systems to the analytics platform via MDM.

- Used Informatica DaaS services to standardize address details.

Our Services

- Cloud Modernization
