LUMENDATA
Modernize Data. Maximize Insights.

Cummins

LumenData Helps Cummins Modernize its Existing Data Platform to the Informatica Suite

Challenge

Inability to catalog data and manage metadata	Inaccurate data context
Absence of an easy-to-use front end for data owners and subject matter experts	Limited visibility of end-to-end data flow
Absence of workflow management in the current tool	Inability of the current tool to capture technical metadata from the data lake and other cloud platforms
Absence of a single point of reference for enterprise data	Limited capability of current tool to find, understand and reuse data

Solution

- ✓ Migrated the already cleansed, consolidated, and data steward-reviewed data from the legacy MDM to the UD MDM SaaS solution
- ✓ Cleansed legacy MDM data with IDQ standardization rules to improve the quality of the master data.
- ✓ Requirements gathering sessions to drive the data model, matching, survivorship rules, workflow, and UI designs.
- ✓ Deduped the legacy MDM data in UD MDM SaaS solution via enhanced matching and survivorship rules
- ✓ Usage of Product 360, Customer 360, and Supplier 360 domains to upgrade the data platform

Benefit

They implemented a modern data platform that enabled accurate and quick data access to the right team.

Our Services

- Cloud Modernization
- Data Strategy & Business Value Assessment
- Data Analytics & Engineering
